| Portfolio: <https://sasunmadhuranga.vercel.app>

IT graduate specializing in AWS cloud infrastructure and DevOps engineering, with hands-on experience in Docker, Kubernetes (EKS), Terraform, and CI/CD automation using Jenkins and GitHub Actions. Designed and deployed production-grade, containerized microservices on AWS EKS and ECS Fargate, with infrastructure provisioned as code using Terraform across VPC, IAM, and networking layers. Experienced in serverless architectures (AWS Lambda), event-driven pipelines, and monitoring with CloudWatch. Seeking a Junior DevOps Engineer or Cloud Engineer role.

Technical Skills

- **Cloud Platforms:** AWS (Lambda, S3, DynamoDB, ECS, EKS, CloudWatch, IAM, VPC), Microsoft Azure
 - **DevOps & Tools:** Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD, Linux
 - **Programming:** Python, JavaScript, TypeScript, Java
 - **Frameworks:** React.js, Next.js, Node.js, Express.js
 - **Databases:** MongoDB, MySQL
 - **Security:** JWT, RBAC, API Security
 - **Concepts:** Microservices, REST APIs, Event-Driven Architecture, IaC, Agile, Git
-

Professional Experience

AI/ML Intern | ARTecX Solutions

Sep 2025 – Mar 2026

- Built AI-powered chatbot systems using Python and FastAPI, automating 100% of user query handling.
 - Packaged microservices into Docker containers and shipped cloud-native applications to Microsoft Azure.
 - Implemented real-time location tracking using geospatial data and interactive maps, supporting 1,000+ concurrent requests.
 - Collaborated with cross-functional teams following Agile methodology and SDLC practices to deliver scalable software solutions.
-

Projects & Technical Experience

Cloud-Native Instagram Clone Deployment (AWS + MERN + Docker + CI/CD) 2025 – 2026

MERN Stack, Docker, AWS EKS, Amazon ECR, S3, ALB, Terraform, Jenkins, Kubernetes

- Developed and deployed a containerized MERN stack application using Docker and AWS EKS (Kubernetes), enabling scalable and highly available microservices architecture.
- Architected CI/CD pipelines using Jenkins, automating build, test, and deployment processes and reducing manual effort by 80%.
- Configured Kubernetes Ingress with AWS Load Balancer Controller (ALB) for secure, path-based routing and external access to services.
- Provisioned and managed AWS infrastructure using Terraform (Infrastructure as Code), including VPC, IAM, EKS, and networking components for repeatable deployments.
- Hosted frontend on Amazon S3 with static hosting, improving performance and availability.

Real-Time Stock Market Data Analytics Pipeline

Mar 2026

AWS Lambda, S3, DynamoDB, SNS, Athena, CloudWatch, Python, GitHub Actions

- Designed and executed a serverless real-time data pipeline to ingest and process stock market data.
- Built event-driven workflows using AWS Lambda and S3 triggers for validation and anomaly detection.
- Stored processed data in DynamoDB and raw data in S3 for a scalable data lake architecture.
- Integrated SNS alerts and enabled analytics using Athena and Python visualization tools.
- Automated CI/CD pipelines and established monitoring with CloudWatch, reducing deployment errors by 30%.

AI German Language Learning Chatbot (AWS CI/CD)

Mar 2026

React, FastAPI, Docker, ECS Fargate, ECR, S3, GitHub Actions

- Architected an AI-powered chatbot providing real-time grammar correction and LLM-generated responses with <1s response time.
- Orchestrated containerized services on AWS ECS Fargate, achieving 99.9% uptime.
- Streamlined Continuous Integration and Continuous Delivery (CI/CD) pipelines, reducing deployment time from hours to seconds.
- Defined a scalable cloud architecture with secure API communication between frontend and backend, reducing vulnerabilities by 40%.

Education

BSc in Information Technology (Second Class Upper Division)

2021 – 2025

University of Moratuwa, Colombo, Sri Lanka

Certifications

Architecting Solutions on AWS – AWS (Coursera)

2025

Credential ID: CQ1CR81FWCLX
